~~No Solution, or Infinitely Many Solutions - Consistent & Inconsistent Systems~~

*Algebra - Wikipedia*

There can be no solution to an algebra equation because of limitations of the domain. For example,  $x+3 = 2$  has no solution if the domain for  $x$  is the set of positive integers,  $x*3 = 2$  has no ...

*Solving Equations Identities and No Solution*

Then we'll look at the two weird kinds of solutions: "no solution", and the solution that is "all  $x$ ". The solution process ends in nonsense in the former case, and in a trivially-true statement in the latter. Because students don't encounter these types of solutions often, they're easy to forget, and thus easy to confuse.

Many students assume that all equations have solutions. This article will use three examples to show that assumption is incorrect. Given the equation  $5x - 2 + 3x = 3(x+4)-1$  to solve, we will collect our like terms on the left hand side of the equal sign and distribute the 3 on the right hand side of the equal sign.  $5x$

Determine the number of solutions for each of these equations, and they give us three equations right over here. And before I deal with these equations in particular, let's just remind ourselves about when we might have one or infinite or no solutions.

### *Mathway | Algebra Problem Solver*

Virtual Nerd's patent-pending tutorial system provides in-context information, hints, and links to supporting tutorials, synchronized with videos, each 3 to 7 minutes long. In this non-linear system, users are free to take whatever path through the material best serves their needs. These unique features make Virtual Nerd a viable alternative to private tutoring.

How to tell if a linear equation has one solution, no solution, or infinitely many solutions. ... MATH1131 Linear Algebra: Chapter 4 Problem 17 - Duration: 7:18. MathsStatsUNSW 78,779 views.

*How to find out when an equation has no solution - Algebra 1*

No, we can actually have any value for  $x$ , so this one has infinite solutions. What about the equation  $4x + 9 + 1 = 4 + 4 + 2x + 2x$ ? We combine like terms first:  $4x + 10 = 8 + 4x$ .

questions with step-by-step explanations.

*Number of solutions to equations | Algebra (video) | Khan ...*

Elementary algebra is the most basic form of algebra. It is taught to students who are presumed to have no knowledge of mathematics beyond the basic principles of arithmetic. In arithmetic, only numbers and their arithmetical operations (such as  $+$ ,  $-$ ,  $\times$ ,  $\div$ ) occur. In algebra, numbers are often represented by symbols called variables (such as  $a$ ,  $n$ ,  $x$ ,  $y$  or  $z$ ).
