Explore It!: Reduce Risk and Increase Confidence with ...

The first key to lowering risk is to allocate your money between different investment classes. Your portfolio should include stocks, bonds, cash equivalents, and possibly other investments such as real estate. The proportion of these allocations will depend on the level of risk you want to shoulder overall.

Business Experiments are an effective way to reduce risk. They involve rolling out the high-risk activity but on a small scale, and in a controlled way. You can use experiments to observe where problems occur, and to find ways to introduce preventative and detective actions before you introduce the activity on a larger scale.
