General Air - Welding, Gas, Safety, Medical, Beverage, and ... Tanks can be made of plastic, polyethylene, metal, polyurethane, steel, and galvanized steel. Fuel tanks crafted from steel and metal may be prone to corrosion, especially if they are regularly exposed to moisture. On the other hand, plastic, polyethylene, and polyurethane tanks provide longer service life because these are more resistant to rust.

Rock Valley Gas Tanks Products

The FAA has issued a Special Airworthiness Information Bulletin about hazards associated with water contamination of fuel tank systems in Cessna Model 100, 200, or 300 series aircraft, which warns that pilots should "assume some water exists in the fuel tank system on the airplane." The SAIB also includes more than 10 recommendations on how [...]

Fuel & Air Fuel Tank Parts | RockAuto
A fuel tank (or petrol tank) is a safe container for flammable fluids. Though any storage tank for fuel may be so called, the term is typically applied to part of an engine system in which the fuel is stored and propelled or released (pressurized gas) into an engine. Fuel tanks range in size and complexity from the small plastic tank of a butane lighter to the multi-chambered cryogenic Space ...
