The new Epson Home Cinema 5050UB and Home Cinema 5050UBe 4K PRO-UHD aren't the most expensive home theater projectors in the company's line-up, but at the moment they are arguably the most advanced, and make the loudest statement about how the company views today's still-evolving home projector market. Even in this update to the popular HC 5040UB and 5040UBe, a refresh nearly three years in ...

Short-throw projectors, on the other hand, can project a 100-inch image at a distance of only 4 or 5 feet. Check your specific projector's manual for a chart that lists the distance required to display (or throw) an image onto a specific sized screen. This will help with the entire projector setup process.
