Research-Paper-About-The-Fetal-Pig-symsys03.stanford.edu

Fetal research is research done with living fetuses either inside the uterus (in utero) or outside the uterus (ex utero). Fetal research, in many contexts including this report, also refers to research with embryos. Some confusion about these terms is understandable, because they are used differently in various contexts. For example, although in legal writing the term "fetus" refers to all ...
