forming the question, or need help seeing how the lab relates to stoichiometry; performing the stoichiometry; special care should be spent making sure students are using the acetic acid mass, not the mass of the vinegar. To save time I have made this Stoichiometry lab answer key so I can quickly check student work. creating a step-by-step procedure

PhET Interactive Simulations - PhET: Free online physics ...

The primary aims of the lab are: 1) Relate the real-world example of making sandwiches to chemical reactions 2) Describe what limiting reactant means using examples of sandwiches and chemicals at a particle level 3) Identify the limiting reactant in a chemical reaction

Science Note Cards Flashcards | Quizlet

Stoichiometry allows chemists to determine the theoretical yield of a product. additionally after performing an experiment chemists can then calculate percent yield using the experimental value from the lab and the theoretical value from calculations.
