(PDF) The validity of the Occupational Stress Indicator (OSI)

An occupational stress indicator is something that serves as a measure for employee stress in the workplace, or an example of something that has been known to cause stress in the past.

Psychologists and researchers have developed these occupational stress indicators to share with business managers and organization leaders, who may then be able to notice these indicators and take steps to ...

Occupational Stress Indicator

The psychometric properties of the Teachers' Occupational Stress Questionnaire (TOSQ) were determined on a population of 1137 participants, 1018 women and 119 men, aged 19 to 60 years.

Occupational Stress Inventory Questionnaire

Stress and Burnout Questionnaire This brief inventory has been designed to help you discover the warning signals of excessive stress. Relate the questions to your life over the last 3 -6 months. Look particularly for changes in your ways of coping, not so much your normal behaviour.

Work related stress - Tools and templates

This stress test uses the Perceived Stress Scale (PSS). Originally created by Cohen et al (1983), it is a highly recognised psychological tool for measuring the perception of stress that's clinically validated and widely used by the NHS and other reputable medical services. It forms part of a wider-ranging self-assessment undertaken by participants of the Be Mindful course, which also includes ...
