What is a solution - Answers

A solution is a specific type of mixture where one substance is dissolved into another. A solution is the same, or uniform, throughout which makes it a homogeneous mixture. Go here to learn more about mixtures. A solution has certain characteristics:

Solution - definition of solution by The Free Dictionary

solution: 1. Answer(s) suggested or implemented to try and solve a question or problem. A solution can be either simple or complex and may require few resources or many resources. For example, the solution to a math question may be addressed quickly with a calculator but the solution to preventing accounting fraud may be more complex and ...

What Is a Solution?

A solution is a homogeneous type of mixture of two or more substances. A solution has two parts: a solute and a solvent. A solution has two parts: a solute and a solvent.

What Is A Solution In

What Is a Solution? A solution is a homogeneous mixture of one or more solutes dissolved in a solvent. solvent: the substance in which a solute dissolves to produce a homogeneous mixture; solute: the substance that dissolves in a solvent to produce a homogeneous mixture; Note that the solvent is the substance that is present in the greatest amount.

What is a Solution? - Edinformatics

A solution is a mixture of a solute and a solvent. A common solvent is water and an example of a solute is salt (sodium chloride). Adding salt to water results in a salt solution, sometimes called a saline solution. A solution will be in one phase, normally a liquid but solutions can be found as gasses and as solids.

Solution | Definition of Solution by Merriam-Webster

Solution, in chemistry, a homogenous mixture of two or more substances in relative amounts that can be varied continuously up to what is called the limit of solubility. The term solution is commonly applied to the liquid state of matter, but solutions of gases and solids are possible.

What is IT solution? - Definition from Whats.com

A solution has 2 parts the solute and the solvent. In mathematics, a solution is the result of solving a problem or equation. In business, it has a similar meaning to the above; something that is ...

solution | Definition & Examples | Britannica

Chemistry A mixture in which particles of one or more substances (the solute) are distributed uniformly throughout another substance (the solvent), so that the mixture is homogeneous at the molecular or ionic level. The particles in a solution are smaller than those in either a colloid or a suspension.

Solution | Definition of Solution at Dictionary.com

In chemistry, a solution is a special type of homogeneous mixture composed of two or more substances. In such a mixture, a solute is a substance dissolved in another substance, known as a solvent.

Chemistry for Kids: Solutions and Dissolving

Kids can learn about meaning ,definition and difference among of solute,solvent and solution in this animation video.

Solution Definition in Chemistry

What is a Solution? A solution is a mixture of one substance dissolved in another so the properties are the same throughout. A solution is composed of a solute and the solvent. The solute is the substance being dissolved and the solvent is the part of the solution that does the dissolving.

What is a solution in science? - Answers

Solution definition is - an action or process of solving a problem. How to use solution in a sentence.

Solution Solvent Solute - Definition and Difference

A solution is a homogeneous mixture of two substances—that is, it has the same distribution of particles throughout. Technically speaking, a solution consists of a mixture of one or more solutes dissolved in a solvent.

What is a solution? definition and meaning ...

1. a homogeneous mixture of one or more substances (solute) dispersed molecularly in a sufficient quantity of dissolving medium (solvent). 2. in pharmacology, a liquid preparation of one or more soluble chemical substances, which are usually dissolved in water. 3. the process of dissolving or disrupting. 4. a loosening or separation.

Chem4Kids.com: Matter: Solutions

In a stricter sense, however, an IT solution is an aggregation of products and services, as opposed to a single, discrete product. To accurately be called a solution, therefore, the antivirus software should be bundled with related products, such as a spam filter or backup service.

What is a Solution in Science? - Definition & Examples ...

A solution consists of a homogeneous mixture. A solution is composed of one phase (e.g., solid, liquid, gas). Particles in a solution are not visible to the naked eye.

Solution | definition of solution by Medical dictionary

Solutions are groups of molecules that are mixed and evenly distributed in a system. Scientists say that solutions are homogenous systems. Everything in a solution is evenly spread out and thoroughly mixed. Heterogeneous mixtures have a little more of one thing (higher concentration) in one part of the system when compared to another.

Solution - Wikipedia

A solution is a homogeneous mixture of two substances—that is, it has the same distribution of particles throughout. Technically speaking, a solution consists of a mixture of one or more solutes dissolved in a solvent.
